PROJECTS

Exelon-ADMS

- As a lead Boomi developer, I developed more than 14 end-to-end integrations, created design documents, gathered requirements.
- Constructed a common error handling framework that is used by more than 110 integrations. I also created Apigee proxies for the integrations that I owned.
- Built Solutions achieving Sequencing and extensive usage of Atomsphere APIs for migrating atoms, schedules and environment extensions.
- Awarded Deloitte's prestigious Applause Award (12/2024) for delivering high-impact solutions in a critical integration project, surpassing project goals and timelines.

PROJECTS

Exelon-Core GIS

- As an Integration Developer, my role was to understand & gather all the functional specifications (mapping, sample files, etc.) from multiple Stakeholders. Post deployments actively helped the QA Testing Teams for all the interfaces that I owned.
- Developed a common Framework 'Circuit Breaker' which was leveraged for the entire project which will be leveraged during DR events.
- Developed 2 Highly complex integrations which includes the usage of various connectors like HTTP rest, Database and SFTP.
- Developed 10+ Apigee Proxies for all the Boomi API integrations. Complete owner of Deployments handling using Azure CI/CD pipelines.

E-Commerce Turnkey project

- Developed 7+ integrations which can be leveraged as the plug and play for the E-commerce setups between various applications including Salesforce and Shopify and Netsuite.
- Actively included in all the brainstorming discussions through out the project phase.
- Received leadership acclaims for the work.

Salesforce Cloud API Vault

- Migration from MuleSoft to Dell Boomi.
- Built 8+ Synchronous APIs Leveraging API Management to implement Business logics using Salesforce connectors with the help of Swagger files.
- Integrations with Samsara for the time logging and Operations with complex logic flows.

Gilead RACT

- Been a single Integration Developer, Actively participated during Design discussions, Requirement Gatherings, Code Implementation, Testing and Hypercare.
- Developed 2 High complex Batch integrations with custom error handling mechanism and complex mapping transformations.
- Involved in Salesforce Development Activities includes minor development activities, creating Connected App with OAUTH configurations.
- Involved in Salesforce Testing activities which is Micro Management(ALM) Testing.
- Monitored Integrations during Hypercare.
- Awarded Deloitte's prestigious Applause Award (02/2023) for delivering high-impact solutions in a critical integration project, surpassing project goals and timelines.

Solidigm

- As an Integration Developer, my role was to understand & gather all the functional specifications (mapping, sample files, etc.) from multiple Stakeholders. Post deployments actively helped the QA Testing Teams for all the interfaces that I owned.
- Built 6+ E2E complex integrations to implement business logic using multiple connectors mostly SAP JCO v2 (IDOC based), HTTP client connector, SFTP, Atom Queues, Webservice server, Database V2.
- Experience in setup of Private Atom in AWS and working with Molecules.
- Integrations involved boundary applications of SAP, Blue Yonder, Microsoft Dynamics, Model N and NetSuite, with functional areas around Account, Contact, Sales order, confirmations and Item Fulfillment.
- Built common framework to route Idocs from SAP to specific integrations & common error framework for ticketing & logging. Engaged with SAP team to setup SAP connectivity with Boomi & Outbound/Inbound partner profiles.
